

What are my trading partners doing via FIX now and what do they plan to do in the future?

By Brian Nathan, Macgregor

FPL is working to answer this question through a survey of the global financial community. In the next few weeks FPL will launch a Global FIX Survey that aims to provide a global view of FIX usage across all uses of FIX. In addition to being an informative resource for current FIX users this survey will be of great use to firms who are currently deciding if, how, when, why to use FIX.

FPL is seeking participants for this survey from the entire global financial community: Buy-Side, Sell-Side, Exchanges, Vendors. We aim to reach a fully representative cross-section of the community by attracting individuals with varied roles: front office, back office, traders, market data providers, development staff, CIOs, CTOs.... With this diverse audience the survey will be able to provide an encompassing perspective of FIX usage globally.

If you want to be included or have your clients or vendors invited to participate in this survey, send the information listed below to the FPL Program Office at the following e-mail address: fpl@fixprotocol.org.

Person's Name

Firm Name

Type of firm (BS / SS / Vendor...etc)
